

To Indiana's School Safety Grant applicants:

Student safety is a top priority for school administrators, teachers and parents. The building code egress and exiting requirements **must be met at all times pursuant to Indiana Code § 22-11-17-2**. Several of the latching/security devices or appliances which are available on the market today create a noncompliant condition when in use. Please be certain that the equipment you purchase maintains compliance with the applicable state and federal statutes, rules, and regulations.

Contact information for the Division of Fire and Building Safety, a Division of the Indiana Department of Homeland Security, is included below and also with your grant application if you desire to discuss a specific piece of equipment or application that pertains to egress or exiting at your building.
